Adhesive Tape Doctor Shenango High Starts Busy Season

NEW WILMINGTON, Sept. 19-Forty miles of adhesive tape is a lot of tape, but that is the amount trainer, Jack Hume, for the past 10 years coach of intramural sports at Westminster College, has used.

At Westminster, Hume is known s the "Adhesive Tap: Doctor." If the tape he has used were placed in one continuous strip, it would reach from Washington, D. C., to Baltimore. Forty miles of tape bought at the corner drug store would cost cver \$2,000.

"When a muscle or ligament is torn, it should be massaged well to soften the injured portion and then taped firmly into place. Nature can then do the real healing," is Hulme's philosophy-of-tape in a few words. Hulme's range of treatment is all the way from a sore toe to broken

The of the most tragic moment's in Hulme's career as Tape-doctor and trainer, came when he found himself confronted with a football player's injured leg and only one roll "I regret," he is reputed to have

said, "that I have but one roll of of his forty-first mile of tape. He will also serve as coaching assistant demonstration.

WHAT WOULD YOU THINK OF A NEIGHBOR WHO KEPT YOUR LAWN MOWER MOST OF THE TIME?

Merely knowing that you are going to get it sometime isn't much consolation when your lawn needs mowing. Future promises do not answer present needs.

It's the same with money as with mowers. The expectation of receiving it sometime is of small utility when it is needed to meet pressing obligations.

Withholding funds from the man you owe makes his ledger look like a lawn that needs mowing.

YOU are neighbor to your merchant.

DON'T keep his money after the 10th.
